DELIVERY
Virtual, On-site, or Hybrid

DURATION
4 days

CERTIFICATION
Microsoft Certified: Azure Security Engineer Associate

AUDIENCE PROFILE

Who This Program Is For

This course is for Azure Security Engineers who are planning to take the associated certification exam, or who are performing security tasks in their day-to-day job. This course would also be helpful to an engineer that wants to specialize in providing security for Azure-based digital platforms and play an integral role in protecting an organization's data.

PROGRAM SUMMARY

What This Course Covers

Official Microsoft Learn security course aligned to Azure security engineering responsibilities across identity protection, platform hardening, application security, and security operations.

TAILORED DELIVERY

Adapt the program around your team.

This outline can be adapted for virtual, on-site, or hybrid delivery, with emphasis adjusted for your team's platform priorities, role mix, and implementation goals.

Enterprise-ready delivery format

VNode ITeS can align labs, examples, delivery pace, and assessment checkpoints to the required audience profile while preserving the official program sequence where applicable.

COMPLETE MODULE SEQUENCE

Module Flow and Topic Coverage

The structure below presents the current delivery flow for this program, including the associated topics covered under each module.

1

MODULE 1

Protect identity and access in Azure

Protect identity and access in Azure

- Manage security controls for identity and access
- Manage Microsoft Entra application access

2

MODULE 2

Protect network infrastructure in Azure

Protect network infrastructure in Azure

- Plan and implement security for virtual networks
- Plan and implement security for private access to Azure resources
- Plan and implement security for public access to Azure resources

3

MODULE 3

Protect compute, storage, and databases

Protect compute, storage, and databases

- Plan and implement advanced security for compute
- Plan and implement security for storage
- Plan and implement security for Azure SQL Database and Azure SQL Managed Instance

4

MODULE 4

Strengthen security posture using Microsoft Defender for Cloud and Microsoft Sentinel

Strengthen security posture using Microsoft Defender for Cloud and Microsoft Sentinel

- Implement and manage enforcement of cloud governance policies
- Manage security posture by using Microsoft Defender for Cloud
- Configure and manage threat protection by using Microsoft Defender for Cloud
- Configure and manage security monitoring and automation solutions
