Who This Program Is For

Built for Administrator, Security Engineer learners validating applied skill in Defender For Cloud, Microsoft Foundry.

PROGRAM SUMMARY

What This Course Covers

To earn this Microsoft Applied Skills credential, learners demonstrate the ability to secure AI solutions in the cloud.

TAILORED DELIVERY

Adapt the program around your team.

This outline can be adapted for virtual, on-site, or hybrid delivery, with emphasis adjusted for your team's platform priorities, role mix, and implementation goals.

Enterprise-ready delivery format

VNode ITeS can align labs, examples, delivery pace, and assessment checkpoints to the required audience profile while preserving the official program sequence where applicable.

COMPLETE MODULE SEQUENCE

Module Flow and Topic Coverage

The structure below presents the current delivery flow for this program, including the associated topics covered under each module.

MODULE 1

Protect Microsoft Foundry solutions by using Microsoft Defender for Cloud

Learn how to secure Microsoft Foundry workloads by using Microsoft Defender for Cloud. Discover AI resources across Azure, assess their security posture, protect against runtime threats, and configure model guardrails in Microsoft Foundry to prevent unsafe or policy-violating content.

- Understand how Microsoft Defender for Cloud supports AI security and governance in Azure
- Protect AI workloads with Microsoft Defender for Cloud
- Configure and manage guardrails in Microsoft Foundry
- Secure Microsoft Foundry environments
